

ARTPHYTON

LOCOMOTOR SYSTEM

Joint comfort for horses.

Pellets - Ingredients : Carob pods, Barley flour, Lucerne flour, Sucrose, Devil's Claw (*Harpagophytum procumbens*) 6%, Horsetail (*Equisetum arvense*) 6%, Blackcurrant (*Ribes nigrum*) 3%, Willow (*Salix alba*) 3%, Erigeron canadensis 3%, Brewer's yeast 3%, Glucosamine HCl 2,5%
Analysis : Fibre 12.5%, Protein 10.7%, Crude ash 7%, Moisture 7%, Crude fat 1.3%, Ash insoluble in HCl 3%, Fat 1.9%, Sodium 0.2%

▼ Nutritional value:

The association of blackcurrant, devil's claw, horsetail, white willow and Canadian fleabane together are reputed for their mineralising and comfort inducing properties.

The maintenance properties of the glucosamine on equine cartilage matrix have been demonstrated. The glucosamine enables normal GAG, proteoglycan and collagen synthesis by the chondrocytes and fibroblasts and hence hyaluronic acid synthesis by the synoviocytes.

▼ Usage:

ARTPHYTON is particularly interesting for horses with for chronic joints and horses requiring enhanced joint comfort.

▼ Recommended administration:

Add ARTPHYTON to the feed for for as long as necessary. Can also be used for periods of 10 days consecutively and to be repeated monthly at a time per month..
