

CHONDRIl ULTRA

JOINT MECHANISM SUPPORT

A readily assimilated natural vitamin E and Rose hip formula rich in vitamin C, galactolipids and fatty acids to help optimise the joint health during effort.

Oral paste in a syringe - Ingredients : Rosehip 13%, Spiraea ulmaria, Glucose
Additives/kg : Vitamins and pro-vitamins: Vitamin E RRR alpha tocopheryl acetate (3a700) 55 760 IU
Analysis : Moisture 50%, Fat 15%, Ash 3%, Fibre 0.3%, Protein 0.3%, Sodium 0.3%

▼ Nutritional value:

Vitamin E is unique in that its sole function is that of a powerful antioxidant, that helps the polyunsaturated elements of the cellular and subcellular membrane in the presence of free radicals. Rose hip contains high level of vitamin C and phytonutrients such as galactolipid (GOPO) and fatty acids, powerful natural antioxidants whose reducing properties inactivate free radicals.

▼ Usage:

CHONDRIl ULTRA is recommended for athletic horses to support healthy joint function, particularly during working programs (training, racing and competing season), when the joints (cartilage, tendons and ligaments) are heavily solicited.

▼ Recommended administration:

1 oral syringe for a standard sized horse (500kg).

Standard sized horses (500 kg):	1 oral syringe
Light horses	½ oral syringe
Ponies	¼ oral syringe

Pack size
• 45 g oral syringe
