

EQUISTRO® EPF 10

Post work-out limb relaxation

Cooling gel for relaxation of the locomotor apparatus

External gel - Ingredients :

- Witch hazel (*Hamamelis virginia*)
 - Association of electrolytes in gel complex (sodium, potassium, magnesium, aluminium, chloride)
- EQUISTRO® EPF 10 does not contain etheric oils e.g. camphor, menthol or romarin oil.

Nutritional value:

EQUISTRO® EPF 10 is a gel for external application only, which relaxes and reactivates the body parts that are constantly solicited during physical activity (joints, ligaments, tendons and muscles). An association of witch hazel and electrolytes, **EQUISTRO® EPF 10** has a neutral pH. It acts via natural osmosis, according to the principal of an equilibrium between an excessive limb temperature and dissipated heat via liquid evaporation. **EQUISTRO® EPF 10** assures a real localised temperature reduction with an immediate effect. Its action is reinforced by witch hazel and its astringent effect.

Recommended administration:

Apply the gel to the skin of the horse which has already been cleaned and dried. Massage slowly to allow the product to penetrate and apply a bandage if necessary.

Apply 2 to 3 times per day

DO NOT USE ON OPEN WOUNDS

Pack size

- 540 ml bottle

Conservation:

Keep **EQUISTRO® EPF 10** cold : the product will be more effective.

Can be administered in complete confidence in accordance with local and international rules up until the day of an official competition or race.
