

EQUISTRO[®] AMINOLITE

Muscular development

Concentrated lysine and methionine, essential amino acids for muscular development

Powder - Ingredients :

- L-Lysine HCL : 20 %
- DL-Methionine : 20 %
- Vanilla flavour

Nutritional value:

Broodmares during the third trimester of gestation, stallions during the covering season, young growing horses as well as horses undergoing a heavy training programme need essential amino acid supplementation in order to maintain muscle metabolism and growth.

L-Lysine - a component of DNA in the cell nucleus, participates in cell multiplication and hence is essential for development.

Methionine - a precursor to many peptides (e.g. glutathione or cystine), has an important role in metabolism. It is essential for the synthesis of actin and myosin and can be metabolised to amines, components of spermatid liquid.

Usage:

- Sports horses during muscle development and conditioning
- Stallions during the covering season for the optimisation of body condition and sperm quality
- Broodmares during the final trimester for an optimal colostrum quality
- Clinical application: Post surgery

Recommended administration:

Add **EQUISTRO[®] AMINOLITE** to the feed ration or drinking water.

Adult horses	
Standard sized horses (500 kg)	2 scoops (= 50 g) per day
Broodmares	4 scoops (= 100 g) per day
Light horses and ponies	1 scoop (= 25 g) per day
Foals	
	Half of the above administration

Pack size

- 1 kg pot with measuring scoop
- 3 kg bucket with measuring scoop

Can be administered in complete confidence in accordance with local and international rules up until the day of an official competition or race.
