

EQUISTRO® ELYTAAN

Complete liquid electrolyte support

Liquid - Ingredients :

- Sodium chloride : 10 %
- Magnesium : 2,9 %
- Potassium : 1,2 %
- Calcium : 0,43 %
- L-Lysine : 1 080 mg/kg
- DL-Methionine : 1 080 mg/kg
- Niacin : 720 mg/kg
- Calcium pantothenate : 720 mg/kg
- Iron (IPALIGO®-TEC) : 260 mg/kg
- Zinc (IPALIGO®-TEC) : 1 450 mg/kg
- Copper (IPALIGO®-TEC) : 190 mg/kg
- Manganese (IPALIGO®-TEC) : 100 mg/kg

Nutritional value:

EQUISTRO® ELYTAAN is a readily available liquid electrolyte formulation. Its composition is adapted to stimulate drinking and partially compensate for NaCl losses. Rich in vitamins (notably vitamin B3 and vitamin B5, trace elements and amino acids (lysine and DL-methionine)), **EQUISTRO® ELYTAAN** provides maximal nutritional support for energetic metabolism and can be used for the constitution of reserves in anticipation of an important fluid and electrolyte loss.

Usage:

Complementary feedingstuff for horses:

EQUISTRO® ELYTAAN can be administered daily for a regular supply of electrolytes, vitamins and amino acids which support metabolism.

EQUISTRO® ELYTAAN can equally be used for the constitution of reserves or regeneration of performance potential:

- during convalescence
- between competitions or directly after a competition
- as a primary support to broodmares after foaling
- prior to transport or a physical effort

Recommended administration:

EQUISTRO® ELYTAAN can be given directly into the horse's mouth allowing administration even when the horse is not thirsty (e.g. osmotic dehydration) or if they cannot swallow large quantities of fluid (e.g. prior to a competition). Alternatively, add to food or water.

Pack size

- 1 L bottle

Can be administered in complete confidence in accordance with local and international rules up until the day of an official competition or race.

Adult horses

Standard sized horses (500 kg)	20 to 40 ml per day
Foals and ponies	10 to 20 ml per day
