

EQUISTRO® FLOGESTAN

Post work out and limb relaxation

Clay-based, plant extract enriched, poultice for muscles, tendons and ligaments

Poultice for external use - Composition :

- Kaolin
- Zinc oxide
- Arnica extract (*Arnica montana*)
- Romarin oil (*Rosmarinus officinalis*)
- Lavander oil (*Lavandula vera*)
- Menthol

Nutritional value:

EQUISTRO® FLOGESTAN is a unique kaolin-based combination containing revitalising components such as zinc, arnica whose action is well documented and lavender with healing virtues when used topically.

These components can penetrate adjunctive tissues, while stabilising the cellular metabolism and maintaining normal blood flow to the skin.

Usage:

Horse : **EQUISTRO® FLOGESTAN** can be used as a hot compress or cold (according to locally applicable rules governing sports and race horses). It is advised to apply the clay :

- as a cold compress in acute situations
- as a hot compress applied during more long lasting situations, or for warming-up of joints, tendons and ligaments.

Instructions:

Cold compress (cooled in fridge) :

- apply generously on area of interest with approximately a ½ cm thick layer.
- 1 or 2 applications per day
- leave to act and then remove with warm water

Hot compress :

- Unskrew lid without removing before heating
- place pot in hot water (70°C à 90°C)
- leave pot in hot water for approximately 20 minutes
- apply (N.B. ensure not too hot) and then cover with plastic film before wrapping a light protective bandage.
- remove with warm water

DO NOT APPLY TO OPEN WOUNDS. Close well after use.
